

project: jEdit commit\_id:13416 class\_name:EditPane.java  
// **get our internal map of buffer** -> CaretInfo since there might  
// be current info already

### Deleted Code

```
Map<String,CaretInfo> carets = (Map<String,CaretInfo>)  
getClientProperty(CARETS);  
if (carets == null){  
    carets = new HashMap<String, CaretInfo>();  
    putClientProperty(CARETS, carets);  
}
```

Inconsistent  
comment

```
CaretInfo caretInfo = carets.get(buffer.getPath());  
if (caretInfo == null){  
    caretInfo = new CaretInfo();  
}
```
