Project:ejbca   commit_id:4977 class_name: LogConfiguration.java

```java
// Fill log configuration data with values from LogEntry constants. Default is true for all
    events.
                                    Changed from LogEntry
for (int i = 0; i < LogConstants.EVENTNAMES_INFO.length; i++) {
  configurationdata.put(new Integer(i), Boolean.TRUE);
}
                                    Changed from LogEntry
for (int i = 0; i < LogConstants.EVENTNAMES_ERROR.length; i++) {
  configurationdata.put(new Integer(i + LogConstants.
            EVENT_ERROR_BOUNDRARY), Boolean.TRUE);
}
```
